Product Specification

S1- BASIC WALL SHELVING UNIT.

Height : 8'

GEEK IT STORES

www.geekitstores.com

STANDARD SHELVING SYSTEM:

Shelving System comprises of individual modular units in multiples of 3 feet or 4 feet in length.

Each modular unit comprises of a fixed base shelf of 18" and 5 tier adjustable shelves of width 15", 12", 12", 12" & 12" respectively. All the 5 shelves are adjustable and can be placed at any height and also at 3 different convenient angles to suit your product range. All the shelves have an Aluminium Strip in front for price tagging to suit your products.

The back of the unit has an attractive, powder coated full metal paneling in front with the color of your choice. Made from 0.8 mm thick G. I. Steel Sheets.

The unit is supported on 2.5 mm thick rectangular punched section for adjusting the shelves as per your choice.

The bottom shelf has adjustable G. I. Bolts for leveling, so that the floor unevenness does not affect the unit contour.

The top of the unit has an attractive Translite (Backlit Display) of 18" height (Excluding Electrical Fittings), with front white acrylic sheets (3 mm thick) and light diffusers at the bottom, to illuminate the shelving & the products. The front frame is completely punched out in one piece, from full metal sheets. The translites may be used for advertising purpose, which is revenue generating.

The bottom of the unit has a skirting of 8" height which is powder coated on front side with the color of your choice.

The total area and volume available in this unit for display and sale is as follows:

Width	Total area available	Total volume available
3 Feet	20 Sq. Ft.	22 Cu. Ft.
